## Wiper Insert Installation

1. Lift wiper away from Windshield

4. Once wiper insert releases from bottom of wiper arm slide insert out assembly

2. Grasp Bottom of Wiper Insert

3. Hold wiper arm with one hand and pull out on insert.

5. With insert completely removed from the wiper arm separate reinforcing strips from rubber material

8. Press reinforcement strip length of wiper insert

6. Discard rubber blade material and keep the two reinforcing strips

9. Repeat procedure for second reinforcement strip.

7. Slide reinforcing strips into new wiper insert as shown

10. Slide insert through notches at bottom of wiper blade.

13. Apply pressure to insert to pull it past the first notch.

11. Continue sliding through all notches on wiper blade.

14. Insert is secured when notch on wiper arm is between the two raised areas on the insert.

12. Blade will stop sliding near the end, where the locking notch is.
